PROFILE

Results-driven Data engineer with 3+ years of experience designing and optimizing Azure-based data solutions. I possess expertise in constructing scalable ETL pipelines using Azure Data Factory, Databricks, Spark, PySpark, SQL, and Python. Proven expertise in migrating and managing enterprise-scale datasets across cloud platforms, enabling real-time analytics and business insights. Recognized for driving impact by transforming raw data into actionable insights while adhering to best practices in Azure Data Engineering.

TECHNICAL SKILL

- | | | |
|----------------------|---------------------------|---|
| • SQL | • Airflow | • Azure DevOps |
| • Python | • Azure | • Project Management & Team Collaboration |
| • Spark/ PySpark | • GitHub/ Git/ Bit Bucket | • Time Management & Stakeholder Communication |
| • Databricks | • CI/CD | |
| • Azure Data Factory | • JIRA | |

PROFESSIONAL EXPERIENCE

Data Engineer - II

Feb 2025 - Present

Aidetic, Bengaluru, Karnataka

- Designed and maintained Airflow pipelines (API-triggered, Snowflake-to-Elasticsearch, SFTP-to-Elasticsearch), improving reliability and reducing query latency by 80%.
- Built Elasticsearch embedding pipelines and collaborated with AI teams to accelerate model training and analytics.
- Migrated legacy workloads (Food & Beverages, Pharma domains) to Azure Databricks, improving performance and cost-efficiency.
- Developed a metadata-driven ingestion framework with automated validation/reconciliation to ensure pipeline reliability.
- Enhanced production stability via proactive monitoring/debugging and implemented CI/CD workflows for streamlined deployments.

Senior Software Engineer (Data Engineer)

Oct 2022 – Feb 2025

Celebal Technologies, Jaipur

- Automated and optimized ETL workflows in Databricks using Python, PySpark, and SQL, reducing manual interventions.
- Designed and maintained Delta Lake architectures with Delta Live Tables and Unity Catalog, ensuring secure and scalable pipelines.
- Migrated and transformed large datasets into Databricks Delta tables, enabling efficient reporting and analytics.
- Implemented robust ETL pipelines using Azure Data Factory + Databricks, ingesting structured/semi-structured data from multiple sources.
- Established CI/CD pipelines for ADF with Azure DevOps Git, ensuring smooth deployments and version control.

EDUCATION

Power System Electrical Engineering, M. Tech. (Master of Technology)

April 2020 - June 2022

Regional college of Education, Research & Technology, Jaipur, IN

Electrical Engineering, B. Tech. (Bachelor of Technology)

August 2014 - June 2018

Govt. Women's Engineering College, Ajmer, IN

CERTIFICATIONS

[Databricks Certified Data Engineer Professional](#)

[Databricks Certified Data Engineer Associate](#)

[Databricks Certified Apache Spark 3.0](#)

[Databricks Certified Data Analyst Associate](#)

[Microsoft Azure Data Fundamentals](#)
